PROFILE

I am a software engineer who is seeking a challenging position that uses a variety of new technologies. Aside from holding two bachelor degrees (mathematics and art), I also have several years of experience in software development and related fields. By way of summary, I've worked as a contractor for Austin-based Silicon Laboratories, where my duties centered upon database development and creating slides for their IDE with C# and a xml schema. My most recent position involved porting a media player from a J2ME to Google's Android platform.

EXPERIENCE

COMPUTER ~ TECHNICAL

- Ported mobile player application from J2ME to Android.
- Developed a database / xml inventory solution.
- Tracked for errors in data sheets and other publications.
- Prepared publications on new application devices upon release.
- Helped develop and maintain streaming web video achieve system.
- Assisted design and implementation of streaming linear video editing application in Flash

OTHER

- Operate as a liaison between our clients and district and regional offices.
- Develop and submit monthly revenue reports.
- Develop and submit weekly revenue forecasts.
- Conduct training classes for supervisors that focus on leadership skills.
- Managed team of twenty employees.
- Excellent communication skills.
- Assisted on-site data collection measuring the level of the Edwards Aquifer
- Performed titrations to determine the concentration of contaminants in waste-water
- Produced quality control reports that measure the accuracy of lab results.
