Jeffrey McLean is a person who was tied in to several accounts. He is currently rumored to be dead in January of this year.

He ran his own personal site which helped me confirm all the connections I made, yay Jeffrey you're such a big help in helping me expose your association with two known furry pedos and now Bella Janke defense via the Mushroom Empire.

<https://web.archive.org/web/20160729190405/http://www.meowpawjects.com/>

Site was not shut down, the uh thingamajig lapsed or whatever Iunno I'm a dumb bimbo. Point is, faggot died in all likelihood cause he kept this running since the early 2000s.

Because of that he did not get to do his normal faggy scrub down, he usually did it every two to four years and made this a nightmare of a week.

This lead to his account tagging two known lolcows all the time. Telikonol, who's Twitter is in 2015 before his thread and ScorkZ who's alias Krenkz was tied via his steam account to the Roblox clan I was sparging about.

Twitter of Jeffrey:

Accounts that Jeffrey has on his mobile page as others, meaning when he died (hasn't logged into any account since) these people were tied to him. And all are very old accounts.

Facebook group associated with the sasquatch YouTube.

They are weird occultists, the children's handwriting is very disturbing.

Found this through his followers and families Facebook. Dox them yourselves.

Steam Group: <https://steamcommunity.com/groups/el64>

Look at the dates, I have way more shit tying these guys all together but mobile formatting sucks, I can send the mods any screen caps needed.

Telikonol and ScorkZ are in the discord I got banned of for sperging out about. The one with children in it.

I didn't know mobile posting would look so bad so that's on you all for not fucking make mobile interact well with your shitty excuse for a site.

Spoiler

Same people.

Special thanks to @CammieDoxGirl @DawnDusk and @ToMendAndDefend for helping me do a format I'm more used to, finding leads and to you faggots for teaching me the format, I guess?

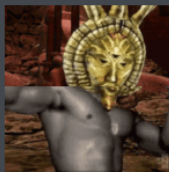

Btw it looks like Xanadu was a splinter group from a faggy furry forum site from the early 2000s. See Jeffreys kitty witty site for more uwu :3

Highlight #2

Imagine getting a second chance to not be a faggot phoneposter by a site rollback and proceeding to double down on the faggotry and phoneposting. OP is beyond saving at this point.

Okay like you guys, format is a thing but more seriously I would really like a gang of fucking pedophile groomers who are hatestalking @DawnDusk and I to get brought to light. If this is an accurate dox and I think it just might be, then we have some serious peices of shit who touched the ILJ shitstack. Can we please just give this a chance and see what we can find? These people seem morbid as fuck.

Hey op, do you not have access to a single pc? Even if the information is relevant id rather rip off my cock then go through these contergan afflicted screencaps.

Atleast start cropping out your fucking menu and search bar, if you do that i might upgrade you from a nigger to a faggot

I used to think that the people that just copy pasted clickbait articles with all the ads and hyperlinks made the shittiest threads.

You proved me wrong.

Not atm and I have 100s of screen caps so I didn't clip them all. Info is relevant as these guys are in old chat forums with the same tags that are tied to YouTube accounts they all share.

It's a rabbit hole of account shifting and I think as soon as Jeffrey died it stopped. And that's how I caught them.

The Akrekz steam account is linked to his 8 year old YouTube account. It's ScorkZ.

This website is great because it archives content before people delete it. Your natural instinct should be to archive, never to link directly. The moment you link something directly, it can be taken down.

**Web Archives**

archive.md creates a full, living backup of a website with all its resources. (example)

full page screen capture is a Chrome extension that automatically caps, records, compiles, and sends you a lossless PNG of exactly what you see. It doesn't interact with anything on the page and takes only a second to use. (example)

Firefox now has this built in using the right-click context menu and it is extremely useful, but do not hotlink content from the firefoxusercontent domain. Download it and re-upload it, or use the clipboard option to paste it directly into your post. I always encourage people to use Brave, but I still have Firefox installed for the screenshot tool.

The lack of archiving means that if one of these losers has a google alert for their name then these people could DFE before anyone gets around to looking at this....Whatever the fuck this is.

Is there a way we can fix the OP? This dox feels kinda personal since the subject targeted me over ILJ related stuff and Dawn, who worked his fucking ass off. Feels like these people stepping in the shit might be poocovered disgusting shitlords.

Where is the dox in the OP? Just the name of the one dude who died? How is the Sasquatch group linked to any of this or to the random people on Twitter?

OP is confusing and messy and I don't see anything interesting for a thread. So they pissed you off in a weird discord server and done some very low-level trolling on @CammieDoxGirl's YouTube account? Who cares? Ignore or deal with them yourselves.

Also, their leader is dead and has been since January? Don't get this or it's purpose.
